

GATES AUTOMATION, INC.

OPERATOR ASSISTED PACKAGING MACHINE

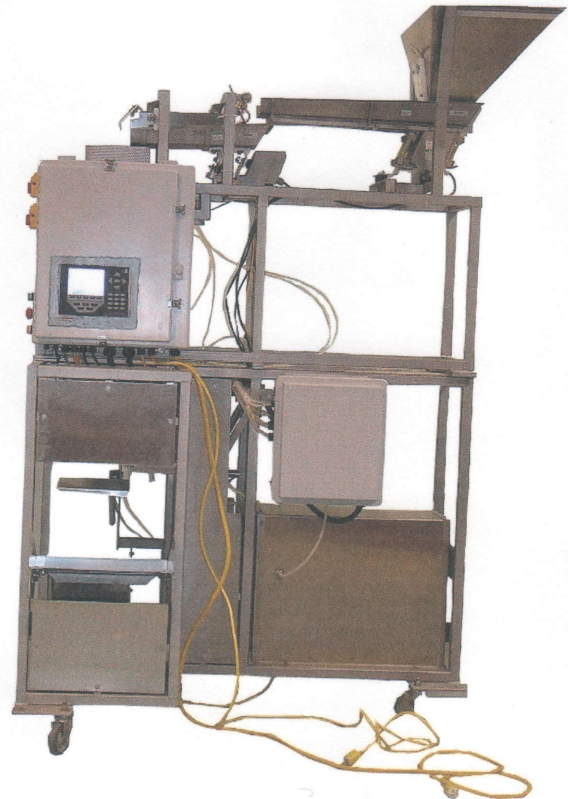

Gates Automation introduces its' latest OPERATOR ASSISTED PACKAGING MACHINE designed to work in TOUGH wash down environments. This new design comes with a dual feed automatic scale mounted above a semi-automatic bagger/sealer.

Operator Friendly!! Helpful and Reliable

There are no foot levers for the operator to activate. Weighing is automatic and correct batches drop directly into bagger funnel. A ready light lets the operator know when the scale is ready. Funnel sensors detect the bag is in position for filling. Operator places filled pouch into sealer which seals, and dispenses automatically. The bag loading area has an adjustable shelf that supports the loaded bag eliminating operator fatigue. A built in shelf on the right hand side of the machine lets the operator conveniently pick up the next pouch for filling. An in-seal date code embosser is optional

Can be ordered with : dual head automatic scales, volumetric fillers, counters and conveyors mounted above. Also available- gas flush, liquid injection, date coding, hanger hole puncher. Machine can include a built-in oilless continuous duty air compressor for portability.

Runs all materials available for packaging- Stand up pouches, flat pouches, flat poly bags, bottom or side gusseted bags, reclosable bags.

SPECIFICATIONS

POWER: 120VAC 15A

OPTIONAL: Built in air compressor 120VAC 10A

LENGTH: 72"

WIDTH: 50"

HEIGHT: Equipped w/automatic scale 100"

WEIGHT: Equipped w/automatic scale 600 lbs.

FEATURES: PLC controlled

Stainless Steel construction

NEMA 4X wash down, lock out.
