

# GATES AUTOMATION, INC.

## Gas1-15 SCALE LOADER

**Gates Automation introduces** its greatest little scale/bagger. Makes batches according to your parameters set and dispenses them into the bag, ready for sealing.

**It automatically** opens the bag for sealing. Have the built in counter let you know when your supply of bags is gone. It will then move the magazine to a new supply of wicketed bags. Or manually flip a switch to move the magazine for the new supply.

**It comes in a** single head or dual head version. Weight parameters are easily programmed. The large read-out screen lets the operator control batching easily. It will NOT dump until the proper weight parameters are met.

### SPECIFICATIONS

(Single Head shown)
